

ACTUARIAL EXEMPTIONS

The University of Oxford has exemption agreements with the Institute of Actuaries. Students obtaining at least an upper second class mark on a relevant paper can expect to be exempted from the corresponding Institute of Actuaries' professional actuarial examination. An Independent Examiner approved by the Institute of Actuaries will inspect exam papers and exam scripts and **may adjust the pass requirements for exemptions.**

Relevant papers are as follows:

- Papers SB3a Applied Probability and SB3b Statistical Lifetime Models together can lead to an exemption from CT4 Models;
- Papers SB4a and SB4b Actuarial Science I and II together can lead to an exemption from CT1 Financial Mathematics;
- An average mark of 60% or above on Papers A8 Probability and A9 Statistics at Part A can lead to an exemption from CT3 Probability & Statistics.

For these exemptions to be granted, lists of candidates satisfying the requirements will be released to the Institute of Actuaries. For data protection reasons, candidates who wish to appear on these lists have to agree in writing that their details may be included. Not agreeing to this may cause considerable delays in the exemption process or even exemptions not being granted.

For the attention of the Chairman of Examiners Part B (c/o Academic Administrator, Department of Statistics, 24-29 St Giles')

I hereby agree that my name, college and date of birth may be included on the abovementioned lists of exemption recommendations to the Institute of Actuaries.
