Practical Pattern Recognition *via* Neural Networks

Brian Ripley

Professor of Applied Statistics
University of Oxford

NIPS*96 Tutorial 2 December 1996

The following pages give the slides for the tutorial and a paper written in mid 1995 for a volume that seems unlikely to appear!

The paper gives recommended further reading. Books on pattern recognition are famously free of examples and practical details. Most of the material here is covered in much greater depth in

Ripley, B. D. (1996) *Pattern Recognition and Neural Networks.*
Cambridge University Press. ISBN 0 521 48086 7.
[For details see `http://www.stats.ox.ac.uk/~ripley/PRbook`]

although the mathematical level there is high.
